

ALAMEDA COUNTY SHERIFF'S OFFICE

SMALL UNMANNED AIRCRAFT SYSTEM MISSION-REPORT FORM

Report No. 2017-59 FAA NOTAM: Yes ☒ No ☐

PART 107: Yes ☐ No ☒

Date: 082717

Time: 0600-1800

Mission Requested by: Alameda County Sheriff's Office Special Response Unit

Mission Approved by: Commander T. Madigan

Requestor's Agency: Alameda County Sheriff's Office

Agency Phone Number: 510-667-7721

Mission Details:

SUAS Pilot: R. Evans

SUAS Observer: R. Hassna

SUAS Make/Model: DJI Phantom 4

Location: Berkeley, Ca.

Type of Airspace: G

Weather: Clear

Wind: 0-5 Knots

FAA Controlling Agency, i.e., NORCAL, Control Tower: OAK

Frequency Used: None Risk Analysis Form Completed: Yes ☒ No ☐

Mission Description: The Berkeley Police Department (UCPD) was tasked with securing the Martin Luther King Park for a protest between President Trump supporters and opponents. By Any Means Necessary (BAMN) and ANTIFA members were expected to take part in the protest and these groups are notoriously violent and encourage civil disobedience, property destruction and physical violence. BAMN states the following on their web page, "BAMN will employ whatever means are necessary to oppose and defeat these attacks on the democratic and egalitarian aspirations and struggles of our people." ANTIFA is described as a movement that engages in varied protest tactics, which included property damage and physical violence.

BAMN and ANTIFA were expected to arrive and confront President Trump supporters and a conflict involving property damage and physical violence was anticipated. The event received extensive media coverage in the days leading up to it. BPD contracted with the Alameda County Sheriff's Office for security and crowd control. The ACSO sUAS team was tasked to fly in support of the ACSO Special Response Unit if criminal activity occurred.

The UAS Team was advised multiple violent confrontations were occurring in the park and adjacent to the park between opposing groups which resulted in people being attacked. SRU requested the UAS deploy and attempt to identify those involved. Approximately 150 black clad members of ANTIFA were present and marching with makeshift weapons (batons, clubs, bottles) and shields and splinter groups of ANTIFA members attacked people they thought were President Trump supporters. Several thousand people were in the area which made the identification of the involved people difficult for officers on the ground. The UAS was deployed after the criminal acts occurred in an effort to identify those committing the physical acts of violence and the UAS team provided situational

updates to SRU to assist them in maintaining order and for their safety and the safety of citizens in the area. The UAS did not identify any of the suspects but did provide their locations to the SRU members on the ground who responded to the area and restored order using crowd management techniques to keep opposing groups separate. Once it was determined the crowd was no longer hostile the use of the UAS was terminated.

Mission Details:

SUAS Pilot: Dep. A. Pagliari

SUAS Observer: Sgt. D. Bonnell

SUAS Make/Model: DJI Phantom 4

Location: Berkeley Police

Type of Airspace: G

Weather: Clear

Wind: Calm

FAA Controlling Agency, i.e., NORCAL, Control Tower: NORCAL/KOAK

Frequency Used: 125.35/118.3 Risk Analysis Form Completed: Yes ☒ No ☐

Mission Description: On the above date and time, Deputy A. Pagliari and I were assigned as operators on the UAV team for a planned protest in Berkeley. We were assigned to observe a free speech event taking place in the park (Martin Luther King Jr. Civic Center Park), which is located across the street from the Berkeley Police station. Our objective was to observe the event and only deploy the UAV if we were provided reports of a felonious act taking place and/or for the preservation of life.

While observing the event, we observed a flatbed truck carrying home-made shields and clubs or sticks. Walking with the truck were approximately 100-150 individuals dressed in all black with their faces covered. While observing the event take place, it appeared the shields and home-made weapons were handed off to the individuals dressed in black (Antifa). During the event, we received updates that the Antifa group had broken off into smaller groups and were attacking various individuals. We were requested to deploy the Unmanned Aerial Vehicles (UAV's) for public safety, due to the continued assaults to the public. We were requested to provide assistance in identifying any individuals involved in the assaults and the locations where the assaults were taking place. During our flights, we provided updated information to the Command Post.

During our in-flight observations, we made an attempt to off-set as much as possible in an effort to not fly over the crowds, while attempting to locate any suspects of the assaults. Once it was determined that there were no other threats of violence to the public, the use of the UAV was terminated.

UCPD contracted with multiple law enforcement agencies, including the Alameda County Sheriff's Office, for security and crowd control. The ACSO sUAS team was tasked to fly in support of law enforcement officers if criminal activity occurred.

The UAS Team was advised a physical confrontation was occurring at the entrance to Sproul Plaza between opposing groups which resulted in people being attacked. Officers requested the UAS deploy and attempt to identify those involved. Several hundred people were in the area which made the identification of the involved people difficult for officers on the ground. The UAS was deployed after the criminal act occurred in an effort to identify those committing the physical acts of violence and the UAS team provided situational updates to officers to assist them in maintaining order and for their safety and the safety of citizens in the area.

The group of assailants was not identified and they concealed themselves within the main group of protestors as the group moved approximately 2 blocks to another location where they became involved in a second physical confrontation. The UAS was used to identify some of those involved and they were apprehended by officers. Not all suspects were identified and they remained in the main group of protestors who continued travelling on foot to People's Park. Officers followed the group to prevent more physical confrontations and the UAS continued flying and providing situational updates during their walk to the park, and at the park, until enough officers were present. Officers used crowd management techniques to keep opposing groups separate. Once it was determined the crowd was no longer hostile the use of the UAS was terminated.

Mission Description: The University of California Berkeley Police Department (UCPD) was tasked with securing the campus for a guest speaker, Milo Yiannopoulos. Mr.

Yiannopoulos is a conservative speaker who was expected to draw large crowds of protesters. By Any Means Necessary (BAMN) and ANTIFA members were expected to take part in the protest against Mr. Yiannopoulos and these groups are notoriously violent and encourage civil disobedience, property destruction and physical violence. BAMN states the following on their web page, "BAMN will employ whatever means are necessary to oppose and defeat these attacks on the democratic and egalitarian aspirations and struggles of our people." ANTIFA is described as a movement that engages in varied protest tactics, which included property damage and physical violence.

BAMN and ANTIFA were expected to arrive and confront Mr. Yiannopoulos' supporters and a conflict involving property damage and physical violence was anticipated. The event received extensive media coverage in the days leading up to it. UCPD contracted with multiple law enforcement agencies, including the Alameda County Sheriff's Office, for security and crowd control. The ACSO sUAS team was tasked to fly in support of law enforcement officers if criminal activity occurred. No flights were conducted. See page 2 for flight details.

Subject: UAV Request

Lt. Liskey,

This message will serve as an official request from the City of Berkeley Police Department for the use of the Alameda County Sheriff's Department Unmanned Aerial Vehicle for events occurring on August 27, 2017. Recent demonstrations and counter protests have resulted in multiple felony assaults as well as explosive devices thrown at or near Police Officers.

At the request of Chief Greenwood, I respectfully request the use of the ACSO UAV for purposes of identifying subjects committing these offenses.

Thank you very much for your consideration.

Respectfully,

Lieutenant Rico Rolleri
Berkeley Police Department

Subject: Request to use ACSO UAV; Sept. 24, 25, 26 and 27

Sheriff Ahern,

This message will serve as an official request from the City of Berkeley Police Department for the use of the Alameda County Sheriff's Department Unmanned Aerial Vehicle Team for events occurring on September 24, 25, 26, and 27, 2017. Over the past several months, demonstrations and counter-protests have resulted in multiple felony assaults by crowd members upon other crowd members, as well as, on Feb. 1 2017 and April 15 2017, explosive devices thrown at or near Police Officers.

I respectfully request the use of the ACSO UAV for purposes of identifying and apprehending suspects committing felony offenses during these incidents.

Thank you very much for your consideration.

Best regards,

Andrew Greenwood
Chief of Police
Berkeley Police Department

ALAMEDA COUNTY SHERIFF'S OFFICE GENERAL ORDER	NUMBER: 6.15
	RELATED ORDERS: General Order 1.02, 1.14, 1.15, 1.17, 4.02, 5.04, 5.07, 5.08, 5.10, 5.12, 5.15, 5.16, 5.18, 5.19, 5.21, 5.24, 5.32, 5.35, 6.05
	ISSUE DATE: July 15, 2015
	REVISION DATE: August 2, 2016
CHAPTER: Operations Support	SUBJECT: Small Unmanned Aircraft System (sUAS)

I. **PURPOSE:** The following procedures are intended to promote the safe, efficient and lawful operation of the Alameda County Sheriff's Office (ACSO) small Unmanned Aircraft System (sUAS). Safety, above all else, is the primary concern in each and every operation, regardless of the nature of the mission.

II. **POLICY:** It shall be the mission of those personnel of the ACSO who are trained in the use of the sUAS to use this resource to protect the lives and property of citizens and first responders in full compliance with applicable laws and regulations, including but not limited to applicable State and Federal Constitution and Federal Aviation Administration (FAA) regulations.

The use of a sUAS can support first responders in situations which would benefit from an aerial perspective and enable responders to detect dangers that could otherwise not be seen. The sUAS can also be utilized for approved training missions.

III. **OVERVIEW:** The FAA Modernization and Reform Act of 2012 provides for the integration of civil unmanned aircraft systems into national airspace by September 1, 2015.

IV. **DEFINITION:**

A. **Small Unmanned Aircraft System (sUAS):** Consists of the small unmanned aircraft weighing under 55 lbs., the command system, a secure control link, and other related safety support equipment.

B. **Unmanned Aircraft (UA):** An aircraft that is intended to navigate in the air without an on-board pilot.

C. **UA Flight Crewmember:** A pilot, visual observer, or other persons assigned duties for a sUAS for the purpose of flight.

D. **Unmanned Aircraft Pilot:** A person exercising control over unmanned aircraft during flight. The pilot will be ultimately responsible for the operation and solely responsible for the input of commands/piloting during flight. The pilot will be certified in the operation of the sUAS by successful completion of an approved training course. The pilot must meet standards required by the FAA. Pilots are authorized to evaluate and accept or decline any mission or portion thereof due to safety concerns.

- E. **Certificate of Authorization:** *COA* (Certificate of Authorization) given by the FAA which grants permission to fly within specific boundaries and perimeters. The ACSO will maintain current COA's consistent with FAA regulations.
- F. **Observer:** The observer is responsible for the visual observation of the sUAS while in-flight. The observer will maintain a visual observation of the sUAS while in flight and alert the pilot of any conditions (obstructions, terrain, structures, air traffic, weather, etc) which affect the safety of flight. The observer will be responsible for all aviation related communications required by the FAA. To accomplish this, the observer will be in close proximity to the pilot to ensure instant relaying of information. The observer will be certified in the operation of the sUAS by successful completion of an approved training course. The observer shall meet standards required by the FAA.

- V. **ORDER:** ACSO will obtain all applicable COA's from the FAA in order to conduct operational or training missions. Requests for deployment of the sUAS will be made through ACSO Dispatch. The Captain of the Office of Emergency Services (OHSES) and the on-call manager can request a sUAS call-out. In the absence of those management personnel or when extenuating circumstances exist, the ETS Watch Commander can request a sUAS call-out.

Per Specialized Services Section P&P 5.01, requests for a sUAS call-out should be made to Dispatch. Dispatch personnel receiving the request for an OHSES call-out shall contact the on-call Emergency Services Coordinator with the available information regarding the request. The Emergency Services Coordinator will gather the information pertaining to the request. The Emergency Services Coordinator will contact the sUAS pilot and notify him/her of the mission. The pilot will determine if the sUAS can be deployed safely and practically. If the request comes from an outside public safety agency the request will be directed to Dispatch at (510) 667-7778.

1. When the sUAS is being flown, operators will take steps to ensure the camera is focused on the areas necessary to the mission and to minimize the inadvertent collection of data about uninvolved persons or places.
2. ACSO will maintain a website for public input to address citizens' concerns and recommendations.
3. The use of the sUAS will be limited to the authorized missions described herein.
4. The sUAS will not be equipped with any weapons.
5. The authorized missions for the ACSO sUAS are:
 - a. Post-incident crime scene preservation and documentation
 - b. Explosive ordnance disposal (EOD) missions
 - c. Response to hazardous materials spills
 - d. Search and Rescue (SAR) missions as defined in California Government Code Section 26614

- e. Public safety and life preservation missions to include barricaded suspects, hostage situations, active shooters, apprehension of armed and dangerous and/or violent fleeing suspects, and high-risk search warrants
 - f. Disaster response and recovery to include natural or human caused disasters including a full overview of a disaster area for post incident analysis and documentation
 - g. Training missions as authorized by the Training Certificate of Authorization
 - h. In response to specific requests from local, state or federal fire authorities for fire response and prevention
 - i. When there is probable cause to believe that (1) the sUAS will record images of a place, thing, condition, or event; and (2) that those images would be relevant in proving that a certain felony had occurred or is occurring, or that a particular person committed or is committing a certain felony and use of the sUAS does not infringe upon the reasonable expectation of privacy
 - j. Pursuant to a search warrant
6. Annually, all procedures, laws and regulations on sUAS usage, shall be reviewed as follows: The Commander of Countywide Services, ACSO Chief Pilot, and the Sheriff's Air Squadron Coordinator and others as designated by the Sheriff shall meet quarterly on the use of the sUAS to include an audit review, flight documentation review and provide an annual report to the Sheriff.

VI. PROCEDURES:

1. A sUAS operation requires a Certificate of Authorization (COA) from the FAA.
2. A sUAS will only be operated by personnel who have been trained and certified in the operation of the system. All agency personnel with sUAS responsibilities, including command officers, will be provided training in the policies and procedures governing sUAS use.
3. All flights will be approved in advance by the Sheriff or his/her designee (at least the rank of captain).
4. The sUAS and all related equipment will be available and issued at the Office of Homeland Security and Emergency Services or at a secure location as designated by the Sheriff's Office
5. All flights will be documented on the mission dispatch form designed for that purpose and all flight time shall be accounted for on the form. The reason for the flight and type of mission as specified above and name of the supervisor approving the operation will also be documented.

6. Prior to each sUAS flight a Notice to Airmen (NOTAM) will be filed with the FAA.
7. The administration, safety policy, training requirements, general operating procedures and pre/post flight actions are contained within the ACSO sUAS Operations Manual.

VII. DATA RETENTION AND PROCESSING

Upon completion of each sUAS mission the recorded data shall be reviewed and evaluated for evidentiary value. Data of identifiable individuals captured during a sUAS mission shall not be retained unless there is reasonable suspicion that evidence of criminal activity is present. All retained data shall be maintained or destroyed pursuant to Sheriff's Office records retention and evidence policies and in compliance with applicable laws and regulations.

Pursuant to Government Code section 6254 (California Public Records Act-) all sUAS data is considered a "law enforcement investigatory file" and is exempt from disclosure under the CPRA

- VIII. PROTECTION OF RIGHTS AND PRIVACY CONCERNS:** sUAS Commanders, operators and observers will consider the protection of individual civil rights and the reasonable expectation of privacy as a key component of any decision made to deploy the sUAS. Each sUAS operator and observer will ensure that operations of the sUAS are consistent with local, state, and federal law.
